

Lab Goal : This lab was designed to teach you more about the Critter.

Lab Description : Extend the Critter class to make a new AnnoyingCriticter. AnnoyingCriticter will pick an actor at random to be its best friend forever (bFF) – the actor chosen must be an actor that will move. AnnoyingCriticter will follow / move towards its bFF in hopes of being near its bFF – it LOVES its BFF! AnnoyingCriticter will eat ONLY rocks and flowers as it does not like to eat things that can move. AnnoyingCriticter will always move one cell in the direction of its bFF. If AnnoyingCriticter cannot move to the cell in the direction of its BFF, it will move to any of its empty adjacent cells just like a normal critter.

Sample Data :

See the main in AnnoyingCriticterRunner

Sample Output :
