**Lab Goal :**   This lab was designed to teach you more about objects and the String class.

**Lab Description :**   Take two words and output them as one word.  You will need to concatenate the two original strings to make a new string.  Concatenate means to add together.

## Sample Data :

```
hello world
jim bob
sally sue
computer science
uil contests
```

**Files Needed ::**
**AddStrings.java**
**Lab04a.java**

## Sample Output :

```
first :: hello
last :: world
sum :: hello world

first :: jim
last :: bob
sum :: jim bob

first :: sally
last :: sue
sum :: sally sue

first :: computer
last :: science
sum :: computer science

first :: uil
last :: contests
sum :: uil contests
```

```
//EXAMPLE STRING CODE

String one = "one";
String two = "two";
String three = one + two;
String four = two + one;
out.println(one.length());
```
